## COLLECTION

Today's symbol of attitude.

Citrus ties' main goal is to redefine the accessory "tie" and convert it into an integral piece of modern men's wardrobe, making it ideal for any hour of the day. As the casual style is increasingly gaining ground in the working world, it's the untamed men with attitude and smart look who are knotting up.

Each tie is part of a unique collection and comes from a particular piece of fabric, selected with excessive attention to quality, design and texture. Fabrics are selected after a long pursuit in warehouses of old dry goods stores in Athens and Piraeus, and a limited number of ties are then made by hand.

The novelty of the proposal lies on the particular design (square form), the aesthetic and materials, as well as on the additional metal details (aluminum), the quality and way of construction.

The casual style of citrus ties makes them an ideal accessory for any time of the day, from the morning at the office to dinner time, or in the Sunday stroll.

**GALLANT**

**DARING**

The collection was made by cotton and wool textiles, which can easily elevate casual clothing while encouraging daring combinations.

The colors and patterns of the collection are inspired by the urban landscape, the live wires of trams making the blue sky of Athens look striped, the bright signs over the bars and the arcades in the city center, the red containers of Piraeus port, the sunrise painting the city gold and the sunset making its streets look metallic.
